

STRIKEREADY

STOP PAYING PREMIUM AI PRICES FOR EVERY TASK.

One platform.

Every SOC function.

The right AI for every task.

Some SOC decisions need serious reasoning. Many don't. Composite AI knows the difference, so you're not running up the AI bill on work that never needed it.

Investigate everything, unmetered.

StrikeReady's Composite AI is built for this reality. Deterministic agents build the memory first, giving reasoning chains the context they need to make judgment calls. You're priced on your environment, not your AI consumption. So you can put AI to work across your whole SOC without your costs rising with every investigation.

5x+

Predicted increase in
inference costs per agentic
workflow through 2028

5-30x

More tokens consumed per
task by agentic AI

70%

Projected increase in AI
spend in two years

93%

Enterprises surveyed that
have exceeded their AI
budgets

Not every SOC task needs a reasoning chain.

StrikeReady doesn't hand your SOC over to frontier models. Composite AI starts with deterministic agents that build the memory first, giving reasoning chains the context they need to make judgment calls.

Built to Remember | Built to Reason | Built for Efficiency

Put StrikeReady to work across your SOC.

StrikeReady works across the full alert lifecycle, threat intelligence, exposure management and defense validation, bringing the evidence together into a clear case ready for action. It carries what it learns about your environment from one investigation to the next, and works within the level of autonomy you choose, from fully automated to human-in-the-loop to analyst-initiated.

Threat Intelligence

Know what matters the moment it lands.

Alert Lifecycle

Take every alert from investigation to action.

Defense Validation

Know if your controls are ready for what's coming.

400+ integrations, working across your entire stack.

StrikeReady works across the security tools you already run, from EDR and identity to cloud, email, network and SIEM. With 400+ two-way integrations built to go deeper into your stack, StrikeReady can build context, investigate and take action across the tools already in your environment.

Your tools stay where they are. StrikeReady works on top of the stack you already trust.

Full coverage, at every level.

Full coverage at every level, the right outcome for every role.

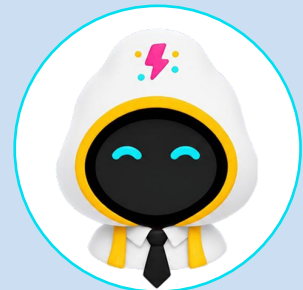

SOC Analyst

Composite AI clears the routine cases, so you work only the ones that need your judgement, with the context already gathered.

SOC Manager

Full coverage across every function of the SOC, with a record you can follow. Every alert worked through to completion, none rationed for budget.

CISO

AI that acts on your terms, with the auditability to prove it's delivering the outcomes you expect, across the tools you already own, at a flat, unmetered cost.

See your whole SOC, on one platform.

Every function of the SOC, every alert investigated, unmetered, on the tools you already own.
